Journal of Biotechnology, 10 (1989) 312–314
Elsevier

Contents of Volume 10

No. 1

Minireview
A.J. Parr (U.K.)
The production of secondary metabolites by plant cell cultures 1

Research Articles
A.A. Quesnel and B.E. Ellis (Canada)
Comparison of UV irradiation and *p*-fluorophenylalanine as selective agents for production of aromatic compounds in plant cell cultures 27

M.W. Glacken, C. Huang and A.J. Sinskey (U.S.A.)
Mathematical descriptions of hybridoma culture kinetics. III. Simulation of fed-batch bioreactors 39

C.-F. Yin, T.W. Joyce and H.-M. Chang (U.S.A.)
Kinetics of bleach plant effluent decolorization by *Phanerochaete chrysosporium* 67

C.-F. Yin, T.W. Joyce and H.-M. Chang (U.S.A.)
Role of glucose in fungal decolorization of wood pulp bleaching effluents 77

Short Communication
G.N. Qazi, V. Verma, R. Parshad and C.L. Chopra (India)
Plasmid-mediated direct-glucose oxidation in *Gluconobacter oxydans* 85

Book Received 89

No. 2

Minireview
D.A. Flores (Australia)
Application of recombinant DNA to rumen microbes for the improvement of low quality feed utilization 95

Research Articles
M. Demura, T. Asakura, E. Nakamura and H. Tamura (Japan)
Immobilization of peroxidase with a *Bombyx mori* silk fibroin membrane and its application to biophotosensors 113

A. Mizutani, K. Takahashi, T. Aoki, K. Ohwada, K. Kondo and Y. Inada (Japan)
Synthesis of gefarnate with reusable lipase modified with polyethylene glycol 121

K. Tanabe, M. Hikuma, L. SooMi, Y. Iwasaki, E. Tamiya and I. Karube (Japan)
Photoresponse of a reconstituted membrane containing bacteriorhodopsin observed by using an ion-selective field effect transistor 127

0168-1656/89/$03.50 © 1989 Elsevier Science Publishers B.V. (Biomedical Division)

313

P. Naouri, P. Chagnaud, A. Arnaud, P. Galzy and J. Mathieu (France)
Optimization of the conditions for preparing bacterial cultures for malolactic bioconversion 135

H. Ohgai, T. Kumakura, S. Komoto, Y. Matsuo, K. Ohshiden, T. Koide, C. Yanaihara and N. Yanaihara (Japan)
Production of rat epidermal growth factor by *Escherichia coli* cells containing a secretion plasmid 151

J. Pellinen, J. Abuhasan, T.W. Joyce and H.-M. Chang (U.S.A.)
Biological delignification of pulp by *Phanerochaete chrysosporium* 161

A. Impoolsup, P. Caunt and P.F. Greenfield (Australia)
Effect of growth rate on stability of a recombinant plasmid during continuous culture of *Saccharomyces cerevisiae* in non-selective medium 171

No. 3

Minireviews
B.E. Christensen (Norway)
The role of extracellular polysaccharides in biofilms 181

A.-M. Francoeur (U.S.A., Sweden)
Biotechnology in forensic medicine: new ways of fingerprinting 203

C.D. Kochakian (U.S.A.)
The role of technology in the delineation of the anabolic action of testosterone 209

Research Articles
D. Roy, M. Lagimonière, M.-J. Hardy, J.-F. Bourassa and P. Mourot (Canada)
Viability of an ectomycorrhizal fungus during cross-flow filtration 227

J.H.T. Luong, A. Mulchandani and C.A. Groom (Canada)
The development of an amperometric microbial biosensor using *Acetobacter pasteurianus* for lactic acid 241

N.A. Da Silva and J.E. Bailey (U.S.A.)
Effects of inducer concentration on *GAL* regulated cloned gene expression in recombinant *Saccharomyces cerevisiae* 253

N.K. Shah, D.N. Shah, C.M. Upadhyay, P.N. Nehete, R.M. Kothari and M.V. Hegde (India)
An economical, upgraded, stabilized and efficient preparation of amyloglucosidase 267

W.C. McGregor (U.S.A.)
Concentration of L-phenylalanine with a reverse osmosis membrane 277

K. Friehs and R.M. Lafferty (F.R.G., Austria)
Cloning and expression of the levanase gene in *Alcaligenes eutrophus* H16 enables the strain to hydrolyze sucrose 285

Y.-M. Kim, M. Hidaka, H. Masaki, T. Beppu and T. Uozumi (Japan)
Constitutive expression of nitrogenase system in *Klebsiella oxytoca* by gene targeting mutation to the chromosomal *nifLA* operon 293

Short Communication
B. Gross, A. Gallois, H.-E. Spinnler and D. Langlois (France)
Volatile compounds produced by the ligninolytic fungus *Phlebia radiata* Fr. (Basidiomycetes) and influence of the strain specificity on the odorous profile 303

Books Received 309
